Location-Based Diary App

User Testing Sheet

Participant ID: 04
Device Model: Redmi K40S
Operating System: Android
Did the map display correctly?
☑ Yes
☐ No
Additional notes (optional):

Task 1 — Purpose-based search

Instructions for participant
Please open the Search function in the app.
Set a radius.
In the purpose input field, type the following:
buy milk
buy groceries
get coffee
eat lunch
go gym
print documents
withdraw cash
buy medicine
pick up parcel
take bus / train
The system should suggest a category such as supermarket.
Please select one suggested category and view the nearby places.

Tester observations
Was the search result shown?
☑ Yes
☐ No
Did the participant understand what to do?
☑ Immediately
☐ After explanation
☐ Difficult
Time to complete (approx):
10 seconds
Comments:
The response speed is very fast.

Task 2 — Another purpose

Instructions for participant

Please perform another search.

Type the following purpose:

get coffee

Select a suggested category and view nearby places.

Tester observations

Search successful?

☑ Yes

☐ No

Time to complete:

12 seconds

Comments:

Task 3 — Category search

Instructions for participant

Instead of typing a purpose, please select a place type directly.

Choose one of the categories such as:

Cafe / Coffee

Then view nearby locations and choose one.

You choose(categories): Supermarket / Grocery

Name of the place: Sainsbury's Local

Tester observations

Was a list of locations shown?

☑ Yes

☐ No

Was the selection process easy?

☑ Easy

☐ Neutral

☐ Difficult

Comments: There are many types of search results, but they are not comprehensive enough.

Task 4 — Create a reminder

Instructions for participant

After selecting a location, please create a reminder entry.

Steps:

1.Select one location.

2.Return to the Add Entry screen.

3.Save the reminder.

Tester observations

Entry saved successfully?

☑ Yes

☐ No

Did the selected location appear correctly?

☑ Yes

☐ No

Comments:

The creation method is very simple and user-friendly.

Task 5 — Geofence notification

Instructions for participant

Now we will test the location reminder.

The tester will simulate or move to the location area.

Please observe whether a notification appears when entering the geofence.

Tester observations

Notification triggered?

☑ Yes

☐ No

Cooldown working (no repeated notifications)?

☑ Yes

☐ No

Comments:

The prompt function is very innovative, but there is a delay.

Usability Feedback

Please rate the following statements from 1 (very poor) to 5 (excellent).

Question	Score
The app was easy to understand	5
The search function was clear	5
Selecting locations was easy	4
The reminder concept is useful	4

Additional Feedback

What did you like about the app?

Very easy to operate and highly practical in daily life.

What could be improved?

The APP interface is slightly messy and lacks beautification.
